

VACANCY ANNOUNCEMENT

PROJECT DIRECTOR

LVCT Health is a Kenyan non-governmental and not-for-profit organization registered in 2002 after a research project that pioneered the first three HIV voluntary counselling and testing centres in Kenya.

We are driven by our vision, the belief and goal of ending new HIV infections in Kenya, the achievement of the best quality of life for those living with HIV and equitable access to universal health for everyone. We are a leader in HIV prevention, treatment, gender-based violence (GBV) and community health programmes.

Over the years, we have continued to offer comprehensive HIV, Sexual and Reproductive Health & Gender Based Violence (SGBV) programming at facility and community level, supported by research, health systems strengthening and policy influencing through innovative, integrated, comprehensive and high impact services and programmes. We target the vulnerable and most marginalized members of the society.

Our work is anchored in a Research-Policy-Practice -RPP framework (Hatua model) through which we implement evidence-informed programs. We pilot innovative solutions to the HIV challenges identified in the national and community priorities and support scale-up for population-level impact.

Key Duties and Responsibilities

Job Requirements/Specifications

Job Qualifications

If you fit the profile of this role and are flexible enough to enjoy the challenge of adapting to the changing needs of an evolving organization as you grow your career, kindly submit your application.

Only shortlisted candidates will be contacted.
